

A Tale of Two States: Access to Oral Health Care

GEORGIA: LOW RESOURCE COMMUNITIES

Head & Neck Surgeon | Nurse Practitioner | Dentist

ACTIVITIES

- Create community-wide oral health network
- Develop curriculum for health care professionals
- Enhance the knowledge of dentists on oral cavity cancers
- Use innovative technology to reduce burden of disease & access to health care

"To be a true leader requires lifelong learning & an openness to understand those with different life experiences. I've been a leader for 20+ years & find the Clinical Scholars trainings continue to make me a better leader." - David Reznik, DDS

MINNESOTA: CHILDREN WITH SPECIAL HEALTH CARE NEEDS

Pediatrician | Audiologist | Dentist

ACTIVITIES

- Discuss strategies for communication & care coordination
- Identify & address barriers to oral health care
- Provide strategies to address clinical challenges
- Share social & community supports

"I use what I am learning in Clinical Scholars every day to be a better academic and hospital pediatric dentist, residency training director, & oral health advocate." - Jeff Karp, DMD, MS
